Dear Josh:

Thanks very much for your letter of May 12th. I am sorry not to have answered earlier, but I was on the road two weeks of May and attending orals until last Friday.

The points you make are good and will be taken care of. I will see Gabe next week.

Charlie has asked me to ask you about the cultures you promised to send him, i.e., the various purines, pyrimidines and amino acid. He thought you might have forgotten.

I don't think we ever thanked you and Esther for a pleasant stay in Madison -- we do so belatedly.

As ever,

Dave / *per a.e.a.*
